SUMMARY

Computer Science undergraduate with knowledge of Full Stack Development, Data Analysis, and Web Development. Skilled in Python, SQL, MySQL, HTML, CSS, GitHub, and REST APIs. Familiar with Spring Boot, Angular, Maven, and software development concepts. Strong problem-solving, communication, and teamwork skills with the ability to learn quickly and work in fast-paced environments.

WORK EXPERIENCE

Jobipo – Data Analyst Intern

Mar 2026 – June 2026

- Collected, cleaned, and analyzed large datasets using SQL and Python.
- Worked on business reports and dashboards using Excel and Power BI.
- Identified trends and insights to support business decisions.
- Collaborated with team members to improve workflows and reporting processes.
- Worked in a team environment with strong focus on communication and problem solving.

Freelance Web Developer (Education Sector Project)

Jan 2026

- Designed and developed a responsive school website using HTML and CSS.
- Managed website structure, content, and user-friendly navigation.
- Worked directly with clients to understand requirements and deliver solutions.
- Improved website performance and usability for better user experience.

PrepInsta – Data Analyst Intern

Dec 2023 – Feb 2024

- Worked with datasets using SQL, Excel, and Python for analysis and reporting.
- Created reports and dashboards to present business insights clearly.
- Supported data-driven decision-making through analytical findings.
- Improved data quality through cleaning and preprocessing techniques.

PROJECTS

Human Action Recognition – Python, Machine Learning

- Developed a Human Action Recognition system using machine learning and computer vision techniques.
- Processed video datasets and trained models to identify human activities.
- Improved model accuracy using data preprocessing and feature extraction methods.

- Worked with Python libraries for model training, testing, and evaluation.

Employee Management System – Full Stack Project

- Developed a full-stack Employee Management System for managing employee records.
- Implemented CRUD operations, authentication, and database connectivity.
- Worked with frontend and backend technologies to build a user-friendly system.
- Used MySQL for database management and GitHub for version control.

DeepShield – Deepfake Image Detection System

[Demo Link](#)

- Developed a deepfake image detection system using deep learning techniques.
- Achieved high accuracy through image preprocessing and model optimization.
- Used Python and machine learning libraries for model training and evaluation.
- Improved prediction transparency using Grad-CAM visualizations.

EDUCATION

2022 – 2026	Bachelor's Degree in Computer Science, SRM University, Chennai	CGPA: 7.9
2022	Class 12 (CBSE)	
2020	Class 10 (CBSE)	

SKILLS

Programming Languages: Python, MySQL

Web Technologies: HTML, CSS, REST APIs

Database: MySQL, PostgreSQL

Tools & Platforms: GitHub, Postman

Other Skills: Data Analysis, Problem Solving, Teamwork, Communication, Time Management
